

Fitment to perimeter of BASE Rack dovetail

Full Guard Rail

Full perimeter guard rail system allowing the BASE Rack to be set up as a traditional fully enclosed Deluxe style rack.

$\frac{3}{4}$ Guard Rail

A cross between full and trade guard rails, the $\frac{3}{4}$ system assists with easy rear loading and unloading of items whilst still providing guard rail load security at the front and sides of the BASE Rack.

$\frac{1}{4}$ Guard Rail

Perfect for campers providing a level mount for a rooftop tent whilst still providing guard rail load security at the front or rear of the rack depending on set up.

Trade Guard Rail

Great for loading longer items such as timber or ladders with the side guard rails preventing items slipping off the side of the rack during loading and unloading.
